### **Ainul Mardhiyyah Mohamed Razib**

Cyber Security Engineer  
IBM Innovation Services Pte Ltd

*Nominated by the Tech Talent Assembly*

From self-taught coding enthusiast to software engineer at a global firm, Ainul Mardhiyyah Mohamed Razib has exemplified adaptability, resilience, and a relentless commitment to upskilling.

Her journey began with exploring coding on Tumblr, which led her to pursue formal training in information systems at the Singapore University of Technology and Design. Despite initial challenges, Sister Ainul leveraged networking events, career fairs, and mentorship opportunities to secure her first role as a full-stack developer even before graduation, showcasing her determination to succeed in a competitive field.

Sister Ainul's relevance in the tech industry is underscored by her mastery of digital transformation skills and her other role as a social media content creator. Reaching over 80,000 followers across social media platforms, she demystifies tech careers and offers guidance on resumes, industry navigation, and bridging the diversity gap in tech.

Her advocacy for inclusivity, particularly for the Malay-Muslim community, has made her a role model for young minority women. Despite experiencing discrimination and negative comments on social media, she actively gives back to the community through organisations like Mendaki, challenging societal norms and inspiring others to pursue tech careers.
