

MODEL WORKER

Sofian Amin

Head Operations

Armour Security & Investigations Pte Ltd

Nominated by the Union of Security Employees.

Sofian Amin, a union leader for the past four years, is currently the Head Operations in the security industry. Having worked his way up the ranks over 18 years, he is committed to empowering lower-wage workers and helping them realise their potential.

His focus on Workplace Safety and Health (WSH) is crucial, especially since industry officers often work for service buyers across the island. These officers are sometimes treated as commodities rather than valued employees.

In 2023, an officer from another unionised agency was injured while performing duties at a commercial site in Little India. Brother Sofian, who was present, promptly lent assistance and ensured that the officer's company was informed through the Union of Security Employees (USE). This incident exemplified the union's core value of "Care for Officers".

Brother Sofian actively supports USE's work, attending meetings even after his working hours. He also assists workers in resolving work-related grievances by promptly relaying them to the union for clarification and support.
