

ADDENDUM TO THE TRIPARTITE CLUSTER FOR CLEANERS' RECOMMENDATIONS ON THE ENHANCED TRAINING REQUIREMENTS FOR THE CLEANING INDUSTRY

1. OVERVIEW

- 1.1 On 7 June 2021, the Tripartite Cluster for Cleaners (TCC) had released its recommendations on its review of the Progressive Wage Model (PWM) for the cleaning industry, which were accepted by the Government and implemented under the cleaning business licensing regime through the Order imposed by the Commissioner for Labour. Full details of the TCC Report 2021 can be found at www.ntuc.org.sg/tripartiteguidelines.
- 1.2 The Government had accepted TCC's recommendation for all licensed cleaning businesses to meet the PWM Enhanced Training Requirements (ETR) of two (2) Workforce Skills Qualification (WSQ) modules by 31 December 2022 to ensure their cleaning workforce attain the requisite skillsets under the PWM Skills Ladder.
- 1.3 The two WSQ modules include one mandatory module on Workplace Safety & Health (WSH), and another one to be selected from a list of Core Modules endorsed by TCC. The list of approved WSQ modules will be updated periodically to ensure relevance.
- 1.4 This addendum report sets out the updated list of training modules as validated and endorsed by the TCC for the cleaning industry. Please refer to Annex A for details.
- 1.5 The members of the TCC are listed in Annex B.

2. OTHER RECOGNISED QUALIFICATIONS FOR CLEANING SUPERVISORS & TRUCK DRIVERS

- 2.1 Under the ambit of Workplace Safety and Health (WSH) Council, bizSAFE is a nationally recognised capability building programme designed to help companies build workplace safety and health capabilities.
- 2.2 To attain the bizSAFE Level 2 certification, organisations need to appoint a Risk Management Champion and undertake the responsibility in reducing risks at source by managing the risk and management process at the workplace. TCC noted that there are cleaning businesses that appoint their Cleaning Supervisors as the Risk Management Champion who would have undergone the bizSAFE Level 2 training and assessment. Given that the training outcomes of the modules accepted by the bizSAFE Level 2 certification is comparable to the other endorsed WSQ modules in WSH, TCC thus recommends that for Cleaning Supervisors who had attained the relevant training courses prescribed under BizSAFE Level 2, the supervisor would be considered as having met one (1) training module in WSH under the PWM ETR.

- 2.3 In addition, the TCC also recognised the WSQ Advanced Certificate in Workplace Safety and Health (ACWSH) qualification as an acceptable equivalent to a WSH module for Cleaning Supervisors, given that the ACWSH provides more in-depth training and is pegged at a higher proficiency level.
- 2.4 For the job role of Truck Driver, the TCC is of the view that the attainment of a Class 4 or 5 driving licence would already equip these heavy-vehicle drivers the necessary skillsets to enable them to carry their work safely. Thus, the TCC recommends that the Class 4 and Class 5 driving licence be considered as equivalent to attaining one (1) training module under the PWM ETR for Truck Drivers. The TCC had also previously recommended that Truck Drivers under the Conservancy sub-sector to be classified under the Waste Management PWM with effect from 1 July 2023.

3. CONCLUSION

- 3.1 The TCC is heartened to know that majority of the cleaning businesses had taken early efforts to fulfil the ETR ahead of the implementation date. TCC would like to remind all cleaning businesses to schedule their workers for the mandatory training before 31 December 2022.
- 3.2 Cleaning businesses should note that failing to comply with the ETR by 31 December 2022 are liable to a maximum financial penalty of \$5,000 and may risk having their cleaning business licence suspended or revoked. Cleaning businesses may also be unable to renew their cleaning business licence if the training requirement is not met at the point of licence application / renewal.
- 3.3 The TCC would also like to urge service buyers to allow their service providers to send their workers for training during working hours as long as service standards are not compromised. Service buyers are encouraged to be more empathetic towards their service providers' labour challenges and are advised to engage in open communications to achieve amicable arrangements.
- 3.4 In ensuring the cleaning workforce continues to upgrade and be better skilled to achieve greater productivity, the TCC believes that all stakeholders will stand to benefit and everyone will be able to live, work and play in a clean and safe environment.
