

NTUC Survey on Economic Sentiments in Singapore | 2026

The National Trades Union Congress (NTUC) regularly conducts the **Survey on Economic Sentiments (SES)** to understand the evolving concerns and aspirations of workers in Singapore. The insights gathered inform NTUC's advocacy efforts, ensuring that workers' voices remain central to discussions on workforce development.

The **2025 SES** comprises responses from **4,000** workers collected across survey waves in May and November 2025. This report highlights key issues on workers' minds, draws out differences across workforce segments, and surfaces workers' perspectives on navigating workplace transitions.

Top Concerns¹

Across the workforce, cost-of-living pressures, retirement adequacy, and job security concerns are top of mind

37%

Wages not keeping up with cost of living

28%

Having enough savings for retirement

19%

Job security

Caregiving and AI disruption are also emerging concerns

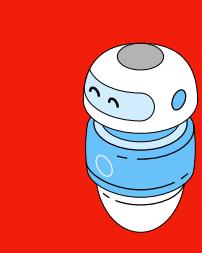

9%

Balancing work and caregiving

6%

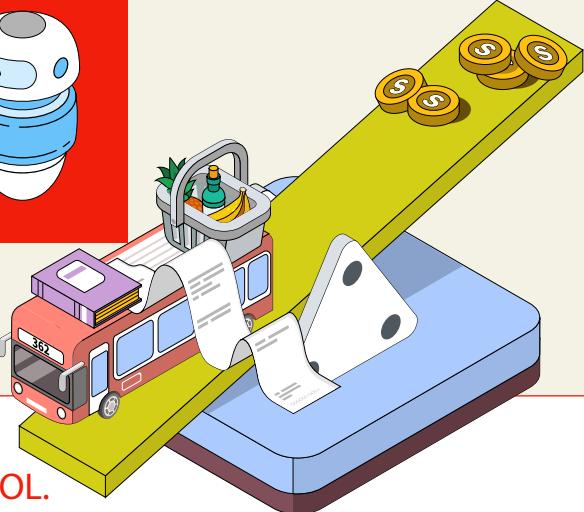

AI disruption

Cost-of-Living (COL)

Workers worry that wages are not keeping up with COL.

COL pressures primarily stem from food and groceries, healthcare, and utilities

Greatest Concerns Related to Cost-of-Living | Nov 2025²

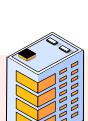

59%

Food and groceries

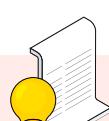

49%

Healthcare

37%

Housing

33%

Utilities

22%

Public transport

15%

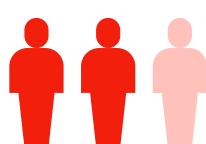

Elder care

In particular, 69% of workers aged 55 and above cite food and groceries as a key concern

Healthcare anxiety rises with age, 71% of workers aged 55 and above cite healthcare as a key concern

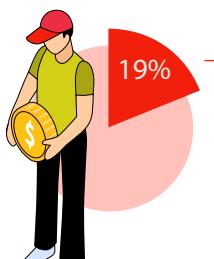

Housing hits younger workers hardest. 49% of workers aged 20-34 are concerned about housing costs

Caregiving expenses peak for mid-career workers (35-54). Childcare (10%) and eldercare (17%) costs concerns are highest among them

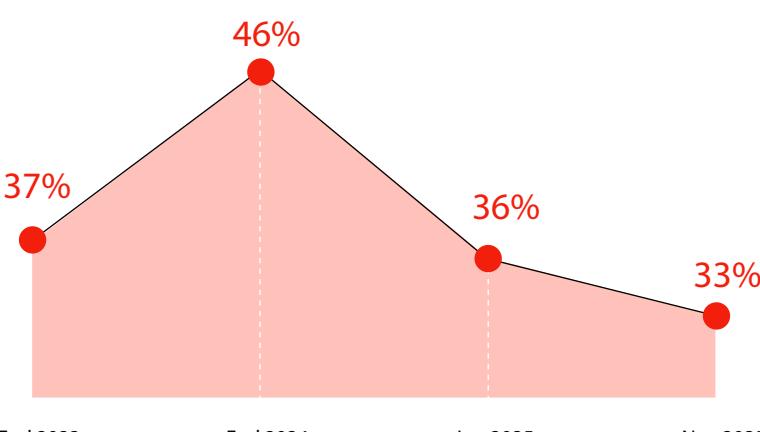

Across all respondents, 2 in 3 feel that their income has not increased sufficiently in the last 12 months.³ Anxieties about income not keeping up have persisted

The segments most sensitive to price increases are lower-wage and older workers

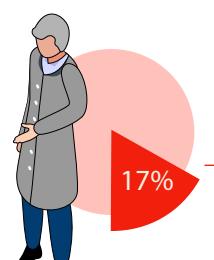

Only 33% agree that income has increased sufficiently in the last 12 months to meet the cost-of-living in Singapore³

Less than 20% of lower-wage and older workers feel that their income has kept up with COL

Lower-wage workers

Older respondents

Workers' Top Concerns

Job Security

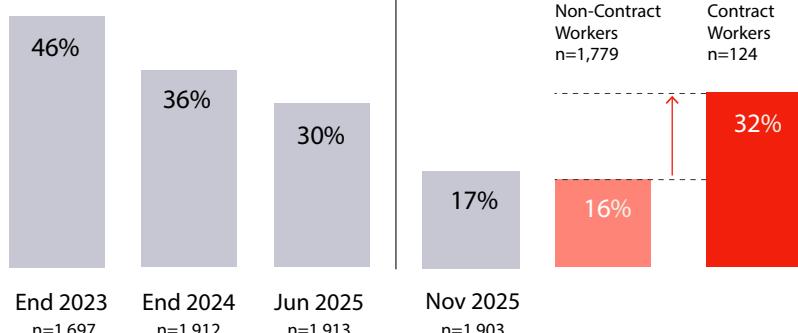

Concern over job security persists, particularly for contract workers

1 of 3 contract workers are not confident of keeping their job in the next 3 months, more than double that of other workers.

“ How likely do you think you will lose your job, or not have your contract renewed in the next three months? ⁴ ”

Key sources of job insecurity are economic uncertainties/business closures, AI/automation and skills obsolescence

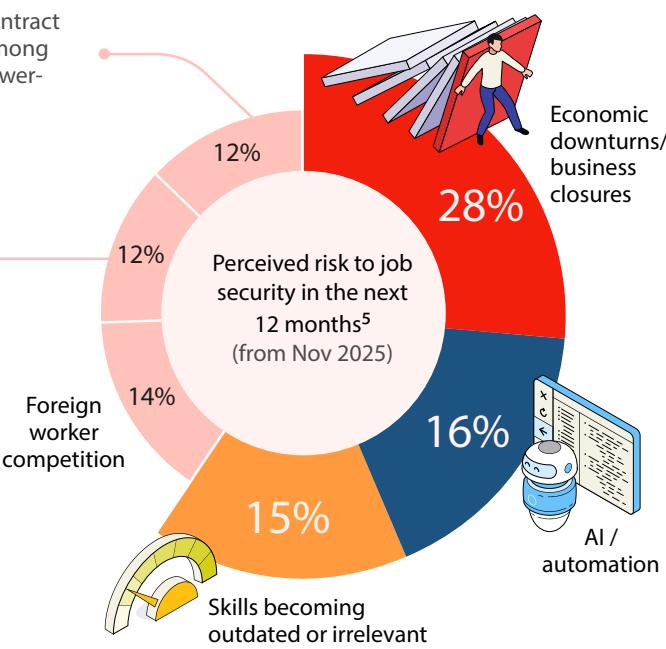

Perceived risks differ by industry, occupation and age

Contract / temporary role

Job insecurity due to contract work is concentrated among contract workers and lower-wage workers

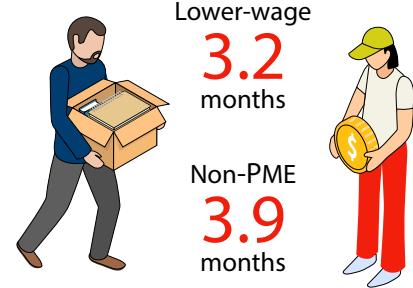

Age discrimination

More older workers cite age-related discrimination

Lower-wage and non-PME workers are more financially vulnerable during job loss

If faced with job loss, current savings can sustain for:⁶

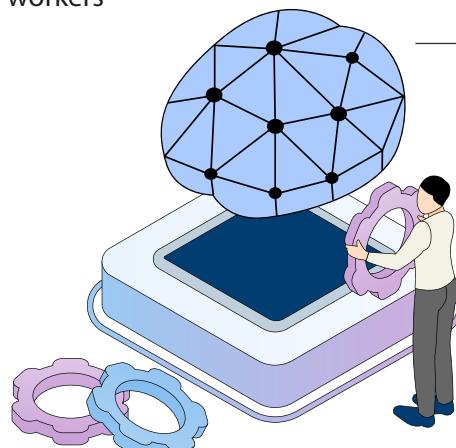

vs the overall workforce average of 4.4 months

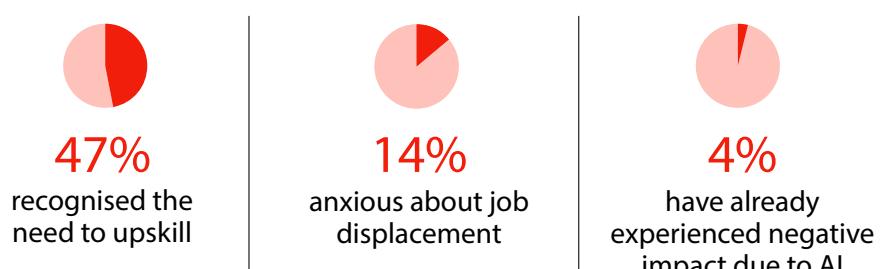

AI

AI disruption is an emerging concern

with 6% of respondents selecting job disruption due to Artificial Intelligence (AI) as their top concern, mainly PMEs and younger workers¹

Impact of AI on current job opportunities⁷

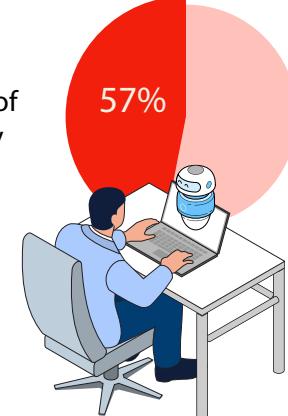

Workers' Top Concerns

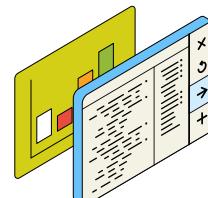

AI sentiments among PMEs and younger workers

PMEs and younger workers are heavy users of AI tools for work tasks and feel supported by their companies in doing so, but are worried that AI would replace their jobs

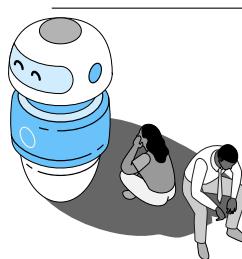

Around **3 in 5** (57%) feel supported by their company in using AI tools at work⁸

Use AI for work tasks (e.g., draft reports, data analysis)⁹

60%
PMEs
57%
Younger workers

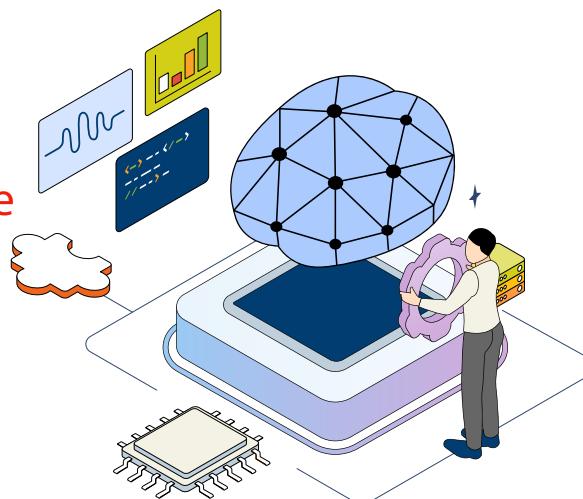

18%
PMEs
and
19%
younger workers

see automation/AI as a threat to their job security⁵

29% of younger workers are worried that AI would replace their job or current role¹⁰
(vs 27% of all respondents)

They hope to gain deeper AI expertise

When it comes to emerging skills like AI, PMEs and younger workers are more likely to want advanced training

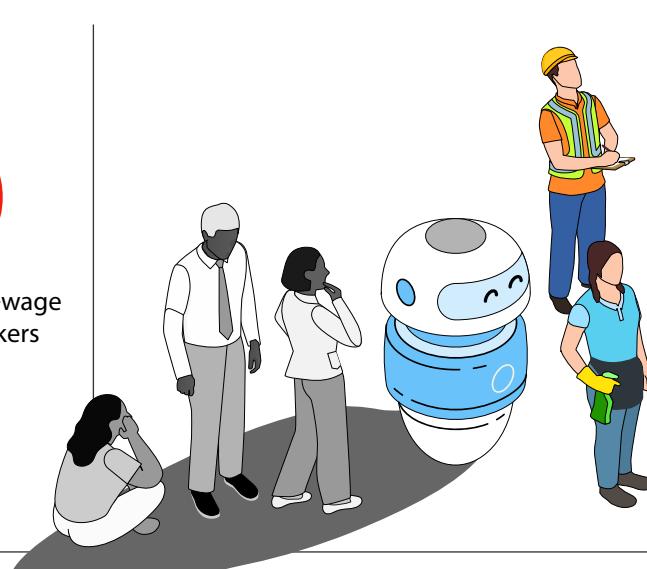

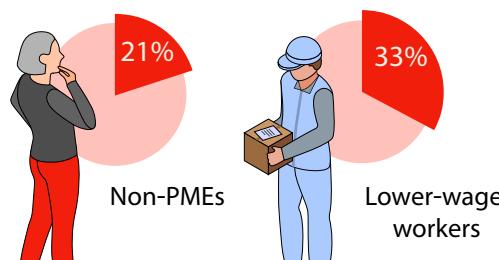

35%
want advanced AI training
(machine learning, data engineering) to adopt AI at work¹¹
(vs 30% of all respondents)

32%
want company-provided AI tool subscriptions¹¹
(vs 29% of all respondents)

AI usage among non-PMEs and Lower-Wage Workers

In contrast, non-PMEs and lower-wage workers do not use AI tools as extensively, and tend to be more unaware of how AI would impact their job opportunities

Do not use AI tools at all¹²

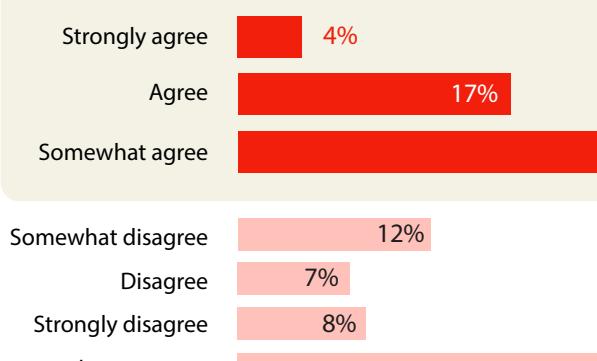

19%
of lower-wage workers⁷ and

11%
of non-PMEs were not aware of how AI may impact their job opportunities⁷

Looking to NTUC for support

51% of workers believe NTUC can help them if their job is threatened by AI

“ I believe that NTUC can help me if my job is threatened by artificial intelligence (AI).¹³ ”

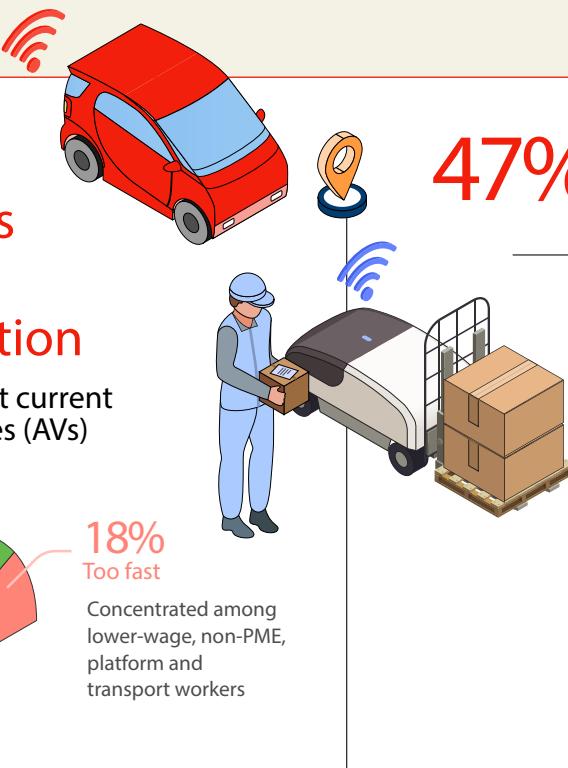

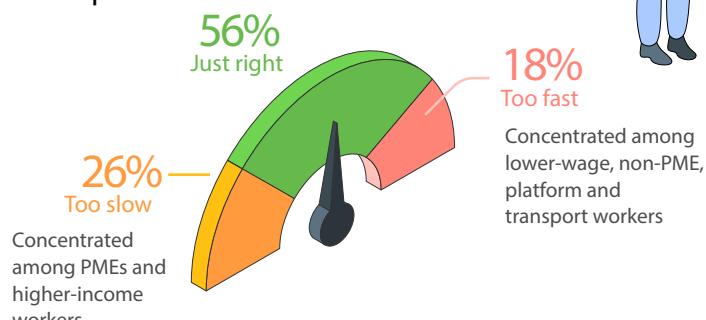

Workers' Top Concerns

AV

The Singapore population shows mixed readiness towards AV adoption

What respondents feel about current pace of Autonomous Vehicles (AVs) adoption:¹⁴

47%

respondents are worried about the safety of riding in AVs¹⁵

Half of respondents express concern that AVs may replace jobs in transport and logistics, especially platform workers (57%) and transport workers (60%)¹⁶

Insights by Worker Segment

Younger Workers (20-34)

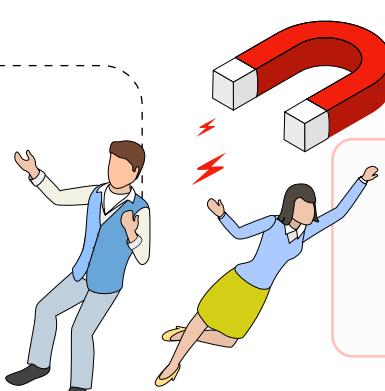

Workers aged 30-34 are more likely to feel held back by limited chances to progress in their current company/industry

64% Limited progression in their current industry/ company

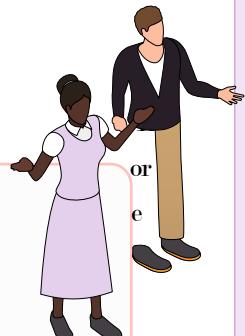

29% Lack of training

Those aged 25-29 are more likely to feel that they are missing out on training and mentorship/guidance

69% feel they have good career advancement opportunities¹⁷

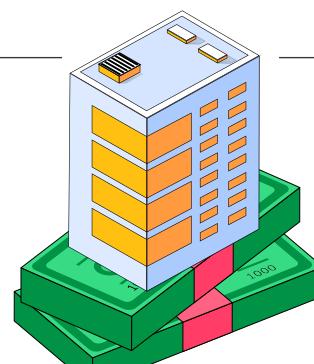

More workers aged 20-24 tend to be more unaware of what opportunities exist

Not knowing what opportunities exist 27%

Lack of mentorship/ guidance 27%

Rising housing costs are also putting financial strain on younger workers

49% of younger workers identify that housing costs is their biggest COL concern¹
(vs. 35% mid-career, 15% older workers)

Insights by Worker Segment

Professionals, Managers and Executives (PMEs)

More financially adequate than non-PMEs

38% PMEs feel that income has kept pace with COL³ (vs. 28% non-PME)

Expect career transition

Almost 1 in 2 PMEs

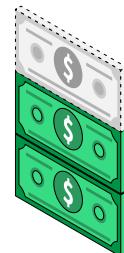

(45%) expect future work to involve switching jobs and taking breaks between roles¹⁹

But are anxious about market value and access to opportunities

Uncertainty about market value

Barriers to achieving desired income²⁰

Lack of opportunities in field

More concerned about impact of global economic uncertainties on their job security

30%

on high alert for economic downturns/business closures⁵ (vs. 26% non-PME)

Concerned about retirement adequacy

52%

want more support in saving for their retirement²¹

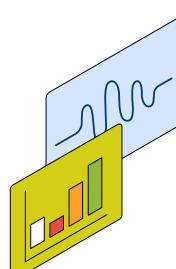

More savvy in using AI at work but are cognisant of the pitfalls in using AI

86%

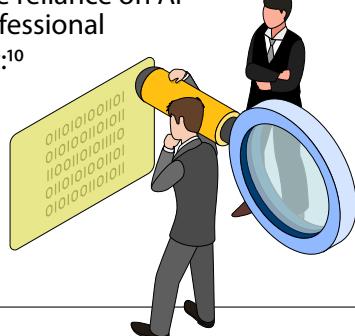

have used ChatGPT¹² (vs. 69% non-PME)

60%

use AI for work tasks (e.g., draft reports, data analysis)⁹ (vs. 47% non-PME)

Despite reliance on AI for professional output:¹⁰

don't fully trust AI accuracy (vs. 45% non-PME)

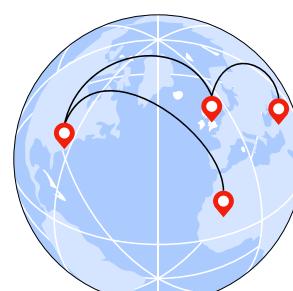

worry about data privacy (vs. 47% non-PME)

concerned about plagiarism/IP issues (vs. 28% non-PME)

Concerned about impact of foreign workforce on career progression, but recognised that they could bring in new skills and help with international networking

32%

feel that foreign workers would reduce promotion or progression opportunities²³

24%

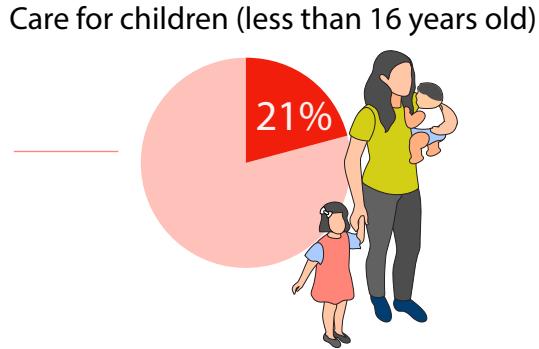

feel that foreign workers could bring in new skills, knowledge or expertise²³

Caregivers

Balancing work and caregiving impact nearly half of all respondents

45%
of 2,000 respondents are caregivers²⁴

44%

Stress, burnout, and exhaustion

40%

Unpredictability of care needs

33%

Need to be physically present at the workplace

Challenges include:²⁵

Close to 1 in 2

(48%) consider leaving their job due to stress from caregiving at least once a month²⁶

The burden disproportionately affects women and younger workers.²⁶

Flexible and supportive workplaces

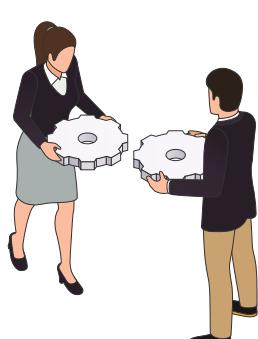

are essential to help workers sustain both career and family responsibilities

While perceived as helpful, many are hesitant to make FWA requests due to potential impact on their job security

71%

believe that applying for Flexible Work Arrangements (FWAs) will impact their job security²⁷

Workers cite manager training, clear HR policies and leadership endorsement as critical to normalise FWAs

How can we facilitate more effective flexible work arrangement practices?²⁸

Training for managers on leading teams with flexible arrangements

41%

Clear appraisal systems for workers on FWAs

39%

Leadership endorsement and role modeling of FWAs

38%

Sharing of best practices of companies that successfully implemented FWAs

35%

Better technology and tools to track progress and facilitate collaboration

34%

Sharing data or evidence on productivity outcomes of FWAs

28%

Promoting success stories of employees using FWAs

27%

Other

4%

Insights by Worker Segment

Older Workers (55 and above)

Around 4 in 10 (37%) prefer a phased transition to retirement³⁰

with 7 in 10 wanting to work beyond the retirement age

71%

Older workers are open to work beyond the current retirement age of 63²⁹

31%

Older workers are eager to keep working beyond age 70 so long as they are healthy³⁰

64%

Older workers cite work flexibility as the most critical support to continue working until retirement³¹

They tend to face a longer job search duration

Expected job search average duration:³²

All age groups

4.9 months

Older workers

6.2 months

Around half are worried about having enough to retire¹

Older workers on saving for retirement

49%

rank this as the top concern¹

2 in 3

say this is an area they need most support in²¹

Cost-of-living concerns²

Older workers perceive healthcare costs as a significant cost-of-living concern

Vulnerable Workers

Lower-Wage, Platform Workers and Freelancers face pronounced cost-of-living pressures and income insecurities

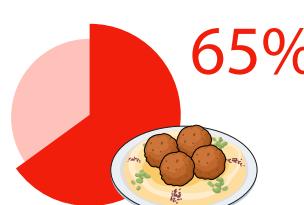

Among lower-wage workers

35%

Work in part-time/contract roles³³

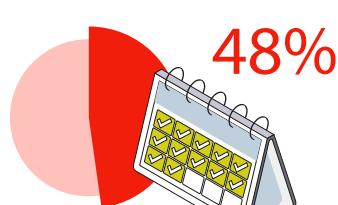

21%

Think they are likely to lose their jobs in the next 1-3 months⁴

65%

are concerned about food and groceries cost²

48%

can only sustain self or household for a maximum 3 months if they lose their job⁶

8 in 10 and
lower-wage workers
(81%)

7 in 10 and
platform workers
(73%)

and 8 in 10
freelancers
(79%)

feel that their income has not increased sufficiently over the last 12 months³

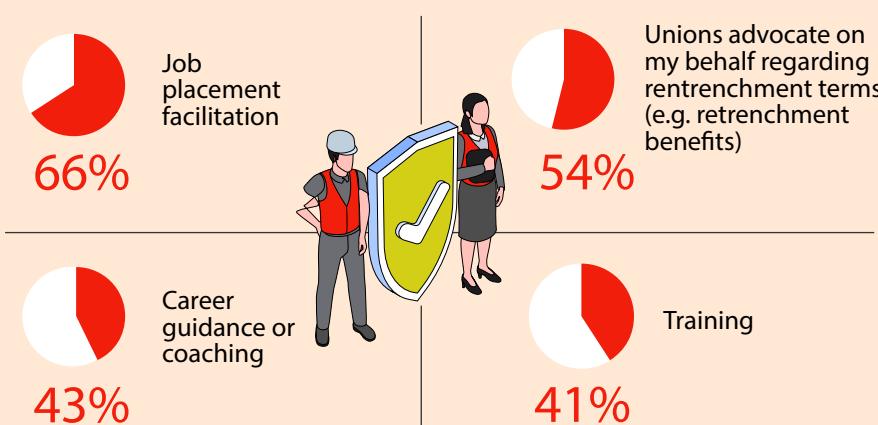

Key Areas of Support

If retrenched or displaced, workers look to NTUC for support

in getting back to work, union advocacy for retrenchment benefits, career guidance and training

Areas of support from NTUC that matter most³⁴

NTUC has proposed to introduce advanced Mandatory Retrenchment Notifications to unions and Government to provide more time for early intervention.

From Apr 2024 to Dec 2025, e2i has provided employment assistance to 104,000 jobseekers, of whom 66,000 have successfully landed jobs. Today, with 27 touchpoints islandwide, NTUC's e2i remains accessible to jobseekers wherever they are.

Training and Upskilling

Workers are motivated to attend training if there are immediate practical applications to their job and can help them earn more.

Close to
2 in 5

are motivated by the prospect of earning a higher salary—especially lower-wage (44%) and platform workers (65%)³⁵

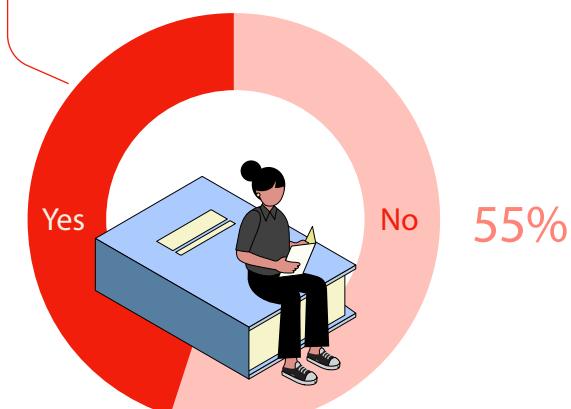

1 in 4

prefer training with immediate, practical applications to their current job³⁵

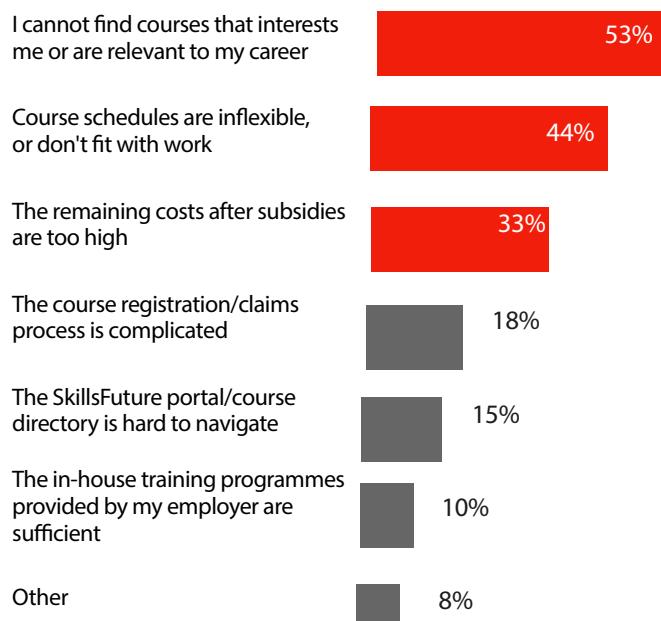

45% of respondents have used their SkillsFuture Credit³⁶

Have you used your SkillsFuture Credit to support your learning or upskilling?

Among those who have not used, many cite difficulties in finding courses that align with their career needs, fitting training around work and managing out-of-pocket costs

Why have you not used your SkillsFuture Credit?³⁷

NTUC has partnered with companies to improve productivity and help workers access training opportunities and better wages through the

Company Training Committee (CTC) initiative

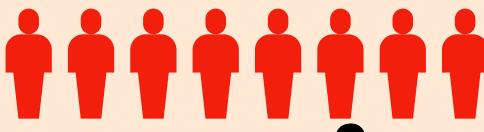

10,000 workers, including PMEs, are set to benefit from the CTC grant, with an average wage increase of 5% above their annual increment, structured career pathways through career development plans and/or skills allowances.

Key Areas of Support

Career Guidance/ Coaching

Majority of those who have sought career guidance found it helpful

8 in 10
found it helpful³⁸

especially in clarifying career direction, connecting to training opportunities and improving confidence in job search

Among those who have not sought career guidance⁴⁰

(56% of respondents)

42%
feel they do not need it

26%
are unsure if advice would be objective or confidential

26%
do not think it would be useful

24%
do not know where to go or who to approach

2 in 10

did not find it helpful³⁸

Among those who did not benefit from it, 1 in 2 felt the guidance was too generic

// What were the reasons why career guidance or coaching did not significantly benefit you?³⁹ //

Guidance was too generic and not tailored to my situation

56%

The guidance did not address my career stage or needs

39%

I was unsure how to act on the advice given

21%

I did not have access to suitable coaches or programmes

17%

Other

11%

Conclusion

**#EVERY
WORKER
MATTERS**

ntuc

The Labour Movement will continue to engage workers, refresh Our Workers Compact and advocate proactively, particularly for those most vulnerable to disruption. We will champion greater representation and protection of SMEs, more support for caregivers and workplace practices that fulfill the potential of our senior workforce.

As we continue to grow our economy, we must ensure our youths have opportunities to learn and secure good jobs. We must also pay special attention to lower-wage workers, platform workers and freelancers. No worker should be left behind.

These priorities reflect our ongoing commitment to support workers through change, and ensuring that Singapore's economic transformation remains anchored in fairness, inclusion, and shared progress.
