**Aidil Lim Beng Ghee**

Team Leader (Engineering, Maintenance and Operations/Operations – Power Plant)  
Senoko Energy

*Nominated by the Union of Power and Gas Employees*

Since joining Senoko Energy in 2013 as a Technical Officer, Aidil Lim Beng Ghee has demonstrated exceptional dedication, expertise, and leadership. Over his 11-year tenure, he has expanded his knowledge across all power generation plants in Senoko Energy, achieving a high level of competency and contributing significantly to operations. Brother Aidil played a pivotal role in Senoko Energy's first M-Gas Station Refurbishment Work, ensuring safety and timely recommissioning. His sharp technical skills and quick response have averted potential plant trips, safeguarding operations.

Committed to continuous learning, Brother Aidil attained a Steam Engineer Class 1 Licence, completed the Work at Height Manager course, and is currently taking an Extra High Voltage (EHV) Switching Course. He also attended Artificial Intelligence courses such as Data Visualisation and Data Analytics, and contributed to digitalisation projects, enhancing efficiency at Senoko Energy.

Recognising the value of upskilling, Brother Aidil shares his knowledge as an On-the-Job trainer, mentoring Technical Officers and ensuring their competency development. His leadership has inspired trainees to excel in their roles.

Brother Aidil's innovative contributions, such as the Job Shadowing Programme, have been recognised by senior management and adopted company wide. He is also one of Senoko Energy's "First Penguins", a symbol and central theme of the company's cultural transformation that began in 2022. This designation reflects his leadership qualities, as he is courageous in taking calculated risks, thinking outside the box, and challenging the status quo.
