

MODEL WORKER

Seshagiri Rao Subramaniam

Senior Executive Engineer
National Environment Agency

Nominated by the Amalgamated Union of Public Employees.

Seshagiri Rao Subramaniam began his journey as a Technical Support Officer in 2007, assisting the technical officer in troubleshooting motors and switching gears in the boiler room. His dedication and hard work earned him two promotions in 2009 and 2010. His responsibilities expanded to assisting the supervisor with a crane upgrade project, where meticulous adherence to specifications and safety protocols was crucial.

In 2013, Brother Seshagiri reached another milestone when he was selected to be involved in the Ash-Crane refurbishment projects. These projects included electrical works, particularly the first in the plant's history, cab tyre replacement. Management recognised his innovative spirit and commitment to safety.

His promotion to a higher grade in 2015 was a testament to his journey of continuous improvement. He honed his troubleshooting skills under the guidance of supervisors and through self-learning from online resources. Sharing knowledge with colleagues became integral to fostering a culture of collaboration and growth.

In 2018, Brother Seshagiri's leadership shone during the Refuse Crane refurbishment project, which was completed on schedule. Undertaking responsibilities from inception to execution underscored his growing proficiency and trust in handling critical projects.

The pinnacle came in 2019 with his promotion to Senior Executive Engineer, recognising a decade-long commitment to ensuring crane availability for plant operations. Focused on completing the Ash Crane cab-tyre replacement project in December 2023, his journey has been one of perseverance and excellence.

Looking ahead, Brother Seshagiri remains steadfast in embracing challenges and furthering knowledge and skills. With ongoing support from supervisors and a collaborative spirit with colleagues, the journey continues.
