

## MODEL WORKER

### Melvin Sim Wei Leong

Former Information Technology Analyst  
The Bank of Nova Scotia

*Nominated by Tech Talent Assembly.*

Melvin Sim Wei Leong embarked on his professional journey in 2014 with a Business Management degree focusing on customer service management.

As the tech industry evolved rapidly, he keenly observed the increasing demand for cybersecurity skills. Recognising the need for specialised knowledge, he proactively engaged in reskilling.

In 2020, Melvin achieved a milestone by attaining a Cyber Security and Forensics degree, showcasing his dedication to staying abreast of industry trends. His reskilling efforts have positioned him as an asset in an industry marked by dynamic changes and substantial growth.

Brother Melvin's adaptability to new challenges and acquisition of in-demand technical skills have significantly broadened his career opportunities within the tech industry. His self-motivated learning reflects a commitment to professional advancement and staying competitive in the job market.

Brother Melvin's success story is marked by his readiness to confront new challenges, relevance in the rapidly evolving technology field, and resilience in overcoming obstacles. Transitioning from a non-technology to a technology role, his journey exemplifies a personal commitment to growth.

His story serves as an inspiration to other workers, highlighting the transformative power of upskilling and reskilling in future-proofing one's career. Brother Melvin's trajectory demonstrates the tangible benefits of adapting to industry shifts, embodying the potential for personal and professional transformation through continuous learning and embracing new opportunities.
